

Research in JOD, 2012-18

Charles Snow

Professor Emeritus

Pennsylvania State University

Statement 1

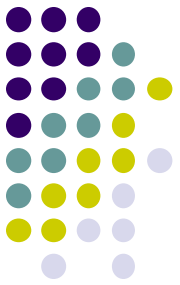

Expand the focus on individual firms to include networks, platforms, communities, and ecosystems.

Statement 2

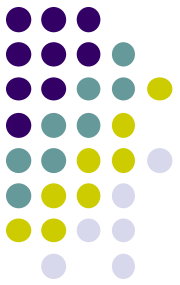

Examine the implications of new enabling technologies for the design of organizations.

Statement 3

Increase involvement in the design process both internally and externally.

Statement 4

Expand organization design theory to include key components of effective designs such as agility and shared situation awareness.

Statement 5

Use research methods appropriate for exploring the future such as experiments, simulations, and prototyping.
