

Interrogating Previous Research Studies in the Restoration of the Maasai Mara Game Reserve and the Mau Forest complex

By Prof. Tabitha Sewe, Prof. Mary Walingo, Prof. Simon Seno, Prof. Almadi Obere, Prof. Nathan Oyaro, Dr. Ruth Choge

The paper interrogates previous researches on the restoration of the Maasai Mara Game Reserve by analyzing their objectives, methodologies, findings and recommendations. The study adopts a content analysis method with a view of classifying the researches into themes. The research identifies gaps in current restoration researches through various categories of researches identified.

Key words: previous research studies, content analysis, themes
